

Olympus Super Kut 180-I

Olympus Super Kut 180i is a multi-functional high-performance cutting fluid. Designed for use in automatic screw machines, lathes, and CNC machining centers, it combines unique EP (extreme pressure) chemistry and superior lubricating properties for the most difficult to machine alloys.

Olympus Super Kut 180i may be safely used on all ferrous and non-ferrous alloys, especially alloy steels, stainless steel, titanium, Waspalloy, Inconel, etc. It can also be used on mild steel, aluminum and copper alloys.

Olympus Super Kut 180i contains extra stain inhibitors and an anti-foam/anti-mist package making it ideal for high-pressure applications. The oil is clean, clear, and has higher flash characteristics than most traditional cutting oils.

TYPICAL SPECIFICATIONS*

Color, ASTM D-1500	2.0
Odor	mild piña colada
Copper corrosion, ASTM D-130	1B
Flash Point, °F, COC, ASTM D-92	435
Chlorine, as chlorinated paraffin	present
Lubricity	present
Sulfur	present
Viscosity, ASTM D-445, SUS, 100°F	110

Contains no PCB, chlorinated/fluorinated solvents or carcinogens

Subject to usual manufacturing tolerances
