

Olympus Super Kut CD

Tri-Purpose Oil

Super Kut CD is a tri-purpose cutting fluid, serving as a cutting oil, machine lubricant and hydraulic fluid in machine tools to eliminate the problem of machine lubricants contaminating the cutting oil.

Super Kut CD is transparent, light colored, and chlorinated. The EP formula used in this cutting oil is non-staining to yellow metals, provides long tool life and allows for faster machine rates.

Super Kut CD can be used as the cutting oil, hydraulic oil and machine lubricant in automatic screw machines. This eliminates the contamination problem caused by leakage of these fluids into the cutting oil, reducing cutting oil effectiveness.

Super Kut CD is effective at providing rust and corrosion protection of parts, cutting tools and the machine. It is formulated with paraffinic base stocks with a high viscosity index. This product has a high flash point, minimizing the potential for fire. It also contains an effective mist control agent that reduces stray mist around the machine. This improves shop cleanliness and reduces operator exposure to the cutting oil.

Super Kut CD allows the user to minimize inventories of other fluids because it is a tri-purpose oil.

Typical Properties:

Viscosity @ 40C	32
Viscosity @ 100F	150
Viscosity Index:	105
Flash Point:	415F
Color:	L1.0
Chlorine:	Present
API Gravity:	32

Subject to usual manufacturing tolerances
