

## Olympus Super TD

**Super Kut TD** is a versatile metalworking fluid. This oil is made with a very high-quality base oil that gives it a much higher flash point when compared to competing products. The oil is also clean, clear and has a very pleasant odor which gives it tremendous operator acceptance.

**Super Kut TD** is designed for a wide range of machining operations ranging from moderate to severe. This oil contains a unique additive package allowing it to be used in multiple applications such as Swiss Screw machining, general purpose cutting/grinding, forming and stamping.

**Super Kut TD** contains active sulfur which gives it very effective machining capabilities, but it does have the potential to stain Copper or Brass.

### TYPICAL SPECIFICATIONS

Viscosity, SUS @ 100F, ASTM D-446	150
ISO Viscosity at 40°C	32
Color	light yellow
Odor	mild sassafrass
Flash Point, °F, COC, ASTM D-92	450
Chlorine	present
Sulfur	present

Contains no PCB, chlorinated/fluorinated solvents or carcinogens
